

# Dual Direction Rear Tine Tiller

The Toro® Dual Direction Rear Tine Tiller features a 127cc Briggs and Stratton engine that delivers optimal power to the rear-mounted tines for impressive soil turning capability without sacrificing maneuverability. Dual Direction tines allow the tiller to bust through sod in CRT mode, and polish the perfect seed bed in SRT mode. Featuring instant reverse, a simple pull of a handle allows you to back up without shifting gears. Dual control handlebars and a compact footprint make maneuvering in tight spaces a breeze and allow for one handed operation. The super-wide airless tires never go flat and provide incredible traction
